

Machine and tooling constructor for pipe, profile and metal sheet working

# TUBE AND PIPE SWAGING MACHINE BY DIES

## Industrial Use

### TRM-660-CS

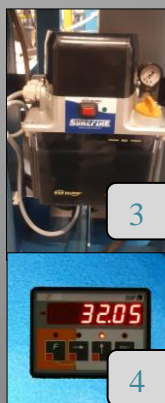

**PRODUCTION EXAMPLES:**

- Round pipe -> for mounting in himself
- Round pipe -> sleeving on square pipe with chamfer
- Round pipe -> transformation in square pipe
- Square pipe -> sleeving on round pipe
- Square pipe -> for mounting in himself
- Oval pipe -> for mounting in himself
- Trapeze pipe -> for mounting in himself
- Rectangle pipe -> for mounting in himself
- Round pipe -> nut crimping

Machine line	TRM 660 - CS
Pipe round section	Ø10 to Ø180 mm
Others Sections pipes	Included inside Ø180 mm or square 125x125 mm or rectangle 160x80 mm
Working length	265 mm maxi

**BENEFITS :**

- Autonomous machine.
- Adjustable pipe stop on tools.
- Mobility (4 caster wheels among which 2 with brake).
- Quick-change tooling.
- Security by safety pedal.
- Many possibilities on request : (see pictures)
  - . (1) fixed or expandable mandrel on hydraulic cylinder
  - . (2) retractable pipe guide.
  - . (3) automatic lubrication.
  - . (4) numerical stop with display.
  - . (5) integrable on C.N.C. production line
  - . (6) combined with all other ATTP process (notching, punching, crushing, ...)
  - . step dies.

**MATERIAL**
